

## SUMMARY

I am a full-stack developer looking for full time position. I am an autodidact with a lot of motivation and passion for learning new technologies. I can work both remotley or in office. I am a very driven, team player who works well within deadlines.

## EXPERIENCE

### Lyxbedemo project

Basic API demo of all CRUD operations using:

- Node.js
- Docker
- Express
- MySql (with mysql2 npm)

### Box Inventory managment project

This project was focused on methodical thinking using the binary tree data structure alongside linked list to create complex searching alogirthms.

- C#

### Animal wiki project

Included the process of planning an ERD for a relational database and creating all CRUD operations and searches, using:

- C#
- ASP.net (as MVC)
- WPF
- Entity Framework
- MsSql

## EDUCATION

2021 - 2022

### FULL STACK DEVELOPER COURSE

*Sela College of technology*

A year and a half long course which was designated for both having a deeper understanding of theoretical conecpts (OOP, design patterns, algorithms etc) as well as hands on exprience and training in putting up actual web projects with varius technologies, also had a lot of focus on writing code that is flexible, readable and maintainable.

In addition I was accepted into a three months long course called Yahalom which Sela provided, this extra learning was about broadening our stack and our exprience writing relevant projects.

2018-2019

### PRO styling course

*Shenkar*

A year long course about the varius types of styling, commercial styling, editorial styling and personal styling. Learned how to produce a complete shoot.

2016-2018

### High School

*Rabin Tel Mond*

My website

### Testy - online tests project

In a team we planned our database and made it a RESTful API, an application for creating, taking and calculating scores of tests, using:

- React.js
- MongoDB (with mongoose)
- Node.js
- Express
- GitHub

### Bunnies - social media project

In a team, we created an application as a RESTful API, for joining groups, adding friends, posting posts with location, pictures etc, using:

- React.js
- Redux
- Node.js
- Express
- MongoDB (with mongoose)
- JWT tokens
- Joi
- Google maps API
- Nodemailer

## ADDITIONAL INFO

### SKILLS

HTML, CSS, JavaScript, TypeScript, React, C#, ASP, .NET, REST APIs, Azure, Entity Framework, SQL, MicrosoftSql ,MySQL, Angular, Docker, UNIT TESTING, LINQ, WCF, Redux, Mongoose, express, MongoDB, JWT, Azure DevOps, Git, GitHub, GitHub pages, WPF, redux.

### LANGUAGES

Hebrew: Native

English: Native

### INTERESTS

Gaming, computer science, biology, dog training and acrobatics.
